*** To create diagonal checkers: Place a piece of masking tape at bottom right corner of a section going up smoothly in a diagonal to the top left corner of the same section. Use a pencil to trace a line on both sides of the tape. Use this same method, lining the tape edge to each subsequently drawn edge until you have evenly spaced diagonal lines across the entire canvas section. Fold 1/2" of masking tape back on itself perfectly to give a straight edge at the end of the tape. Place the straight edge along the furthest diagonal line to begin the perpendicular set of lines. This new piece of tape should be running perpendicular to all existing pencil mark lines. Use this tape as the basis to fill the area with evenly spaced perpendicular lines. The resulting pattern should be a diagonal checkerboard which will follow the curves of the ceramic. Paint every other square 902 Black. ***

To make a spider and spider web pattern on some of the canvas areas, use a thin liner brush and paint in random thin stripes and spiders as indicated in picture.
