"NUTTY NODDERS"

TL DESIGNS - FLYTL14 - 1/98

ASSEMBLY INSTRUCTIONS FOR NODDERS

1. You'll need a spring from a Scioto distributor or Lamp Specialties (part #VSPS) and one square of thin cardboard approximately 1/2" X 1/2".
2. Cast greenware to standard thickness. Cast head to average or thinner thickness. The head tends to get more action if not too heavy! Fire 04-05.
3. Apply desired finish.
4. Twist spring onto a threaded bisque neck, open end of spring down. Screw only about halfway down the threads and try the head. Check for clearance of head above shoulders. If the gap is too wide, screw spring down a little more. Check again. It can be difficult to twist the spring off the threads as it gets tighter as it goes down. If you need to back it off, use pliers and twist off carefully. When the spacing is correct, remove head.
5. Cut the cardboard and slide it into the very top spiral of the spring. This will hold the silicone to attach the head.
6. Squirt a small amount of silicone on top of the cardboard square. Set the head in place until properly balanced. Let dry several hours.

ALIEN CHALKBOARD/FRAME #TL635, 10"

OPAQUE STAINS	CO101	White
CO103	Shadow Gray	Black
CO109	Deep Brown	Flesh
CO120	Parrot Green	Royal Purple
CO139	Crimson	Medium Brown
